Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Specification

1. The specification is objected to as failing to provide proper antecedent basis for the claimed subject matter. See 37 CFR 1.75(d)(1) and MPEP § 608.01(o). Correction of the following is required: basis should be provided for the four flat side walls as set forth in claim 6.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1, 3, 5 and 14 are rejected under 35 U.S.C. 102(b) as being anticipated by Green. Green shows an open utensil/tongs comprising joined pockets at 26, 27 formed from a continuous piece of flexible material 2, the pockets sized to receive the fingers and thumb of a hand (see column 9, lines 65-67) and having closed ends with opposable flattened surfaces near the ends (see Figures 2, 9). Product-by-process claim 1 although reciting features in terms of how they are made (molding) is still a product claim, and it is the patentability of the product and not the process steps (molding) that must be determined. With respect to claim 3 inherently the utensil of Green will have a color thus meeting the limitation of color coded as claimed. With respect to claim 5 inherently the utensil of Green will have a color. The requirement that the color indicate a task is not seen to set forth any structure of utensil not taught by Green or any function of the utensil not inherent in Green. With respect to claim 14 note the symmetry of the utensil of Green.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 2 and 4 are rejected under 35 U.S.C. 103(a) as being unpatentable over Green in view of Jones. Green teaches the tongs having memory (see column 11, line 11) and the pockets joined at a hinge (see Figure 2), but does not teach forming the tongs of plastic. With respect to claims 2 and 4 note the use of plastic by Jones (see column 3, lines 12-15) or the use of paper by Jones (see column 3, line 13). It would have been obvious to one of ordinary skill in the art at the time of the invention to form the tongs of Green of the plastic of Jones to achieve the advantage of employing an alternative material capable of effecting a like result of flexibility and disposability.

Allowable Subject Matter

6. Claim 6 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

7. Applicant's arguments filed October 7, 2004 have been fully considered but they are not persuasive. Contrary to applicant's remarks Green at column 9, lines 65-67 clearly specifies that the thumb be received in one pocket while the remaining fingers be received in the other pocket. The rejection of claims 1-5 and 14 ably set forth above is deemed proper in all respects.

Conclusion

8. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
